V30S-350	1546	3,50	3,44	30	66-88	90-120	16	540
V30S-390	1705	3,90	3,84	30	74-88	100-120	18	540

 La 30S è una vangatrice concepita per l'utilizzo in serra ed orticoltura.

Le sue caratteristiche salienti sono:

- Minore ingombro in altezza
- Peso non eccessivo
- Maggior numero di elementi (vanghe) sulla stessa larghezza
- Ruote di appoggio al posto delle slitte
- Alettone posteriore regolabile tramite martinetto a vite

 The 30S is a spading machine designed for use in greenhouses and horticulture.

Its main features are:

- Lower height
- Lighter weigh
- More spades on the same width
- Wheels instead of skids
- Rear flap adjustable by screw jack

MOD. V30S-310
